## Installation and Maintenance of Aqua Logic Insulated ABS Tanks

### Unpack your Insulated ABS Tank:

- Carefully remove the tank from the box or crate. NEVER lift the tank by reinforcement bars to avoid personal injury or damage to the tank.
- ONLY Lift tank from the bottom, taking care not to drop or rest on an uneven surface.
- If tank includes an acrylic window, take care not to scratch or damage the window while moving the tank-
- Inspect the tank for possible shipping damage. If damaged please refer to the damage claims instructions on the shipping container.

### Placement of your Insulated ABS Tank:

- Place the tank on a sturdy flat surface, free of debris, and rest entirely on its own base to avoid damage.
- If tank came with a stainless steel stand or rack, find a level surface for each of the feet and level the tank.
- Avoid setting stand feet or casters in area that is constantly wet, where possible.
- Before filling, ensure enough space around tank for proposed plumbing or additional equipment, to avoid having to drain and move tank.
- DO NOT move tank with water in it. Empty before moving.
- DO NOT use Insulated ABS Tank outdoors. Placement outdoors will void limited warranty and cause irreparable damage to tank.

### Continued care of your Insulated ABS Tank:

Your Aqua Logic Insulated ABS Tank requires little maintenance but will benefit from the following:

- DO NOT stack tanks or place heavy items on top of tank or reinforcement bars.
- When using lights above tank, avoid direct contact between light fixture and tank and be cautious of excessively hot lights positioned too close to tank (i.e. halides)
- Wipe away dirt or salt build up on the exterior of the tank with a soft cloth, warm water, and a mild detergent if needed.
- Avoid using harsh chemicals in or on your Aqua Logic insulated ABS tank. Do not use abrasive steel wool or scrubbing brushes on tank.
- Periodically rinse and wipe down Stainless steel rack (if you purchased this option) if using in saltwater application.

**Your Aqua Logic Insulated ABS Tank is now in place and ready for use!**
